AUYUITTUQ NATIONAL PARK RESERVE VISITOR SURVEY 1982

Survey Report

Socio-Economic Division
Program Management
Parks Canada
April 1983

ACKNOWLEDGEMENTS

The Auyuittuq National Park Reserve Visitor Survey was a co-operative project undertaken by the Socio-Economic Division, Prairie Regional Office, and the Auyuittuq National Park Reserve. The time and expertise of many persons was contributed throughout the various stages of the survey.

Special acknowledgement is due to: (1) Bill Smith, SED, for designing and managing the survey; (2) David de Lange for administration of the survey and data processing; (3) Sandra Neil for typing and editing the survey report and questionnaire and for her ongoing assistance with the implementation of the survey; (4)Gilles Gauthier (PHQ), Onno Kremers and Liese Dorber (PRO), and Brian Lee, Superintendent of Auyuittuq National Park Reserve for their assistance in planning and implementation of the survey; and (5) Ida Trachtenburg (Statistics Canada), Scott Meis and Jugal Sharma (SED) who provided professional advice as required.

1.0 INTRODUCTION

Auyuittuq National Park Reserve, situated on the Cumberland Peninsula of Baffin Island, is among the most northern and isolated park reserves. The park area includes over 21,400 km², most of which is above the Arctic Circle. The Auyuittuq National Park Reserve has achieved an international reputation with ski tourers, backpackers, climbers, and other wilderness enthusiasts who are prepared to meet the challenge of the harsh, unpredictable Arctic environment.

Interim management guidelines have recently been prepared to control the development and use of the Park Reserve over the next five years until a management plan can be prepared. The management guidelines outline the need for the design and implementation of a periodic visitor survey to provide a data base for the future management planning process. Survey objectives, data requirements, and research design are provided in the planning report. (See Appendix A.)

.../2

2.0 METHODOLOGICAL EVALUATION

2.1 Registration System

All overnight visitors to Auyuittuq National Park Reserve were required to register at either Pangnirtung or Broughton Island. With fewer than 150 registrations annually, a respondent was randomly selected from each address. Government employees visiting the park reserve (15 persons in all) were excluded from the surveyed population. The breakdown of individuals, households, and returns is shown in Table 2.1 below.

TABLE 2.1

Weighting Scheme For
Auyuittuq National Park Reserve Visitor Survey

Australia	2	2	2	1.0000
Austria	1	1	0	n/a
Scotland	2	2	0	n/a
	126	97	80	

.../3

A total of 97 households were surveyed, to which there were 80 responses. The high response rate of 83% can be attributed to the following factors:

1 - a population of park users very interested in the management of the park;

2 - park staff informed visitors that a survey would be conducted;

3 - a Parks Canada lapel pin was offered as an incentive for completing the questionnaire;

4 - after the initial mailing, two additional mailings were conducted, each including a questionnaire and covering letter; and

5 - postage paid return envelopes were provided to all respondents. Exact American and European postage was obtained from local stamp dealers and affixed to the return envelope.

As the registration forms provide addresses of the park visitors and is therefore a vital element in the respondent selection process, the form could be improved by providing space for each party member's address. The existing form has space for only the party leader's name and address, and all other party member's names and addresses had to be printed on the back of the form. This resulted in substantial time delays which searching for names and addresses of 39 parties.

.../4

2.2 Non-Sampling Errors

Non-sampling errors associated with the Auyuittuq survey are mainly attributable to non-response. Non-response may be the result of any number of factors, including:

1 - refusal to answer;

2 - questionniares lost in the mail; and

3 - incorrect or changed addresses.

The non-response was very low for the survey (17%) and was treated by applying a weighting factor (see Table 2.1).

2.3 Data Processing

Data was processed through use of Statistical Package for the Social Sciences (SPSS). A copy of the SPSS system file and coding manual are presented in Appendices B and C respectively. Information regarding the use of the SPSS system file is available by contacting the Data Base Administrator, Socio-Economic Division, Parks Canada, Hull P.Q. Analyses of the runs will be conducted by Prairie Region, Parks Canada, in the near future.

4. Background

Auyuittuq, "the land that never melts", was proclaimed a national park reserve (subject to the settlement of native land claims) in 1976. Situated on the Cumberland Peninsula of Baffin Island, the Park includes an area of over 21,470 km^2 (8,290 square miles) most of which is above the Arctic Circle. The massive Penny Icecap covering over 5,100 km^2 (2,200ft.) dominates the Park highlands whose granite peaks reach heights of 2,100 metres (700 ft.). Glaciers fed by the icecap flow into surrounding valleys. The largest is the Coronation Glacier, a river of ice 32 km (20 miles) long and 3 km (2 miles) wide. Pangnirtung Pass, a 97 km (60 mile) long U-shaped valley which was carved by glaciation forms an ice free passage through the mountains joining Cumberland Sound with Davis Strait. Its highest point is Summit Lake, 400 metres (1,300 ft.) above sea level.

Among the most northern and isolated park reserves, Auyuittuq's fjord coastline and rugged glacier formed landscape provide a world class challenge to climbers, backpackers, and skiers. Naturalists also have the opportunity to observe many species of arctic plants, animals, and birds that are protected within the Park. Most visitors fly to Frobisher Bay from Montréal and from there to either Pangnirtung or Broughton Island, a trip of over 2,600 kilometres (1,750 air miles). Visitors are registered into and out of the Park from these hamlets. Because the Park has a limited air evacuation and ground rescue capacity, during the registration process

staff check: the adequacy of the food, shelter, clothing and equipment visitors are taking with them; their proposed itinerary; and to see whether or not visitors are aware of potential safety hazards and park emergency procedures. Visitors need to be well prepared and physically fit. Most visitors enter the Park from Pangnirtung and confine themselves to the Pangnirtung Pass and climbing areas near Summit Lake.

The Park has long cold winters and short cool summers. Because most of the Park is above the Arctic Circle, visitors experience total darkness in mid-winter and 24 hours of daylight from May through July. Weather changes rapidly from day to day often without warning.

The summer visitor season provides visitors with excellent opportunities for hiking, climbing, nature study, and photography. During the open water season (July 15 to October 20) visitors hire local Inuit outfitters to take them the remaining thirty kilometres (20 miles) by freighter canoe to the Park. The area is subject to local and fierce storms during which outfitters will not venture into the fjord. Within the steep walled fjord dangerous wind and tidal conditions are often encountered. As well, there is an intertidal bench which can only be crossed by freighter canoes about three hours either side of high tide to land visitors in the Park. From late June to early September Pangnirtung Pass and the floors of other valleys are clear of snow. There is an average of twenty five days with rain and fifteen with fog. The sky is frequently

cloudy and there is almost a constant wind blowing. Both the difficult terrain and changeable weather require visitors traveling in the Park to exercise considerable caution.

Travel by water and land is both difficult and dangerous during the spring breakup (June 10 to July 15) and fall freezeup (October 20 to November 25). Although it is possible to walk into the park along the shoreline during breakup, torrential streams which cascade down the side of the fjord may block access.

Although few persons visit the Park during the winter frozen period (November 25 to June 10), in April, May, and early June weather conditions are ideal for winter recreational activities such as snowmobiling, cross-country skiing, and snow shoeing. During these months the temperature is warming up but the snow still has a hard surface. Barrier ice along the shore creates some problems of access to the Park. Until early May it is still possible to travel the length of Pangnirtung Pass by snowmobile. Wind scour may make travel by snowmobile difficult in places. As well visitors may encounter avalanches and whiteouts.

Visitor use statistics have been kept since the area was first identified as having national park potential. In recent years between two and three hundred overnight visitors have stayed in the park each year.

visitors travel in groups of more than five persons in size.

Interim management guidelines have recently been proposed

to control development and use of the Park over the next five years until a management plan can be prepared.

The management guidelines call for the design and implemetation of a periodic visitor survey to provide a data base for future management planning. In the interim, this survey will provide input for co-operative regional planning and development initiatives. The adequacy of existing, and need for new, visitor services, as well as the issues of public safety and visitor access, will have to be monitored on an ongoing basis.

5. Survey Objectives

(a) to provide a profile of visitor and trip characteristics;

(b) to monitor the usage of park facilities;

(c) to estimate recreational participation facilities;

(d) to identify visitor information and orientation requirements;

(e) to determine the extent to which visitors rely on local community accommodation and services;

(f) to estimate direct visitor expenditures in the NWT and park region;

(g) to obtain visitor views with respect to selected park management issues.

6. Data Requirements

Basic data is required to monitor and estimate trends in Park visitation, facility usage, and activity participation rates.

Contact with Warden Service

Origin is an important variable affecting visitation because it is a good indicator of the travel costs and distance traveled by visitors to reach the Park. Party size and composition will vary depending on whether or not the visitor is traveling with a commercial tour, an organized group or family and friends. Length of stay and party size are key factors in determining peak loadings and the degradation of resource values which may be associated with visitor use of a particular site or facility. A considerable amount of planning and preparation is required to visit the Park. Problems with local transportation may upset tight schedules in unpredictable ways. As well the adequacy of the information and orientation provided by park staff is a major factor in the overall success of the visit. Not only visitor use but also their reaction to existing facilities and services will be important considerations in future planning and management decisions.

A regional analysis of park visitor expenditures, and the demand for accommodation and support services will be made. The following variables will be used.

Table 5: Regional Data

Information Adequate

Community Accommodation Used

Visitor Expenditures

The number of non-resident visitor parties attracted to the area by the Park will be determined from place of origin. Non-resident visitor party expenditures represent an important inter-regional transfer of funds stimulating local economic activity. Some tourists, such as the char fishermen, would have visited the local area in the absence of the Park. The ability of the Park to attract additional visitors to the area can be determined from the number who choose the Park as their main destination. Other auxiliary variables such as length of stay in the Park, as a proportion of the total time in the area and the length of trip, will help clarify the extent to which the

Park is able to attract visitors to the area. Length of stay in the area also influences the demand for community accommodation and other support services. Another factor affecting usage of the Park, and promoting a safe and enjoyable visit, is the extent to which visitors have advance information to plan their trip. To the extent that visitors are aware of what awaits them in both the Park and adjacent communities, they will be better able to plan their time to take advantage of existing opportunities.

Public input is required on a variety of management issues. Not only the views of local people, but also those of park visitors, are being sought.

Table 6: Management Issues

Number of Visitor Parties Encountered
Perceived Crowding
Measures to Limit Use
Restrict Access to Certain Areas
Use Services of a Qualified Guide
Park Rescue Capability Improved
Permit Aircraft in the Park
Trail System Improvements
Park Expansion

A major management concern is the ecological impact of sustained visitor use which at the present time is largely confined to the Pangnirtung Pass. As well visitors may have an adverse reaction to crowding at park campsites and along the trails

during the peak season. At the present time visitor use is restricted to designated campgrounds and trails, and a pack in/out policy is enforced. Park management would like to know if there is any pressure to open up more remote areas of the Park and to develop additional marked trails and campsites. Moreover, they would like to know if there is any demand for commercial outfitting and tour guide operations within the Park. Visitor views are being sought, as well, with respect to Park rescue capabilities and air access to the Park. Auyuittuq offers a unique wilderness experience matched by few parks within Canada or the world. Park management do not want to inadvertently destroy what they are charged to protect.

7. Research Design

(a) Survey Population

The survey population will include all park visitors during the open water season. The option of surveying visitors using the Park during the winter off season will be considered once returns from the summer peak season have been assessed.

Table 7: Park Visitors By Month of Arrival (1980)

Month	Visitors	
	n	(%)
March-June	96	(27)
July	188	(53)
August	55	(16)
September	13	(4)
October-February	--	(-)

About eight out of ten visitors stay overnight in the Park.

(b) Sample Design

All visitors must be registered into and out of the Park from either Pangnirtung or Broughton Island. These registration documents will provide the basis of the survey frame. The potentially small survey population precludes the use of any sample selection procedures because, even without non-response, there are likely to be less than 200 respondents. Random sampling will result in over and under selection of respondents because of the variability in party size. There is unlikely to be an adequate number of respondents to stratify a sample by origin (eg. Canada, USA, and Other) and party type (eg. Commercial Tours, Organized Groups, and Other). Even with a convenient basis for the selection of a systematic sample, this procedure is likely to be biased and inefficient. For these reasons, a respondent will be selected from each household (permanent address identified from the registration forms) using randomization procedures.

(c) Data Collection

Upon their return from the Park a questionnaire will be mailed to each respondent's home. An addressed envelope (with pre-paid postage) will be included when the questionnaire is mailed. A second mailing will be made to non-respondents which will include a friendly reminder.

Respondents will be rewarded with a poster or button. This offer will be made explicitly in the letters of introduction accompanying each mailing to encourage participation.

A mailback, as opposed to a handback questionnaire or an interview, has been chosen as the method of data collection for the following reasons. Parks staff are unable to assume responsibility for the administration of the questionnaire in addition to their regular duties. As well, park management fear that the conduct of the survey would adversely affect the information and orientation session park visitors receive when they register. Under field conditions it would be very difficult for the respondent to fill out the questionnaire, and visitors are so preoccupied with transportation and other arrangements that the return rate is likely to be very low. Some of the questions, moreover, can only be answered accurately after the respondent has returned home.

(d) Data Quality Controls

Copies of the registration form will be sent to the Socio-Economic Division (Ottawa) on a weekly basis. Questionnaires will be mailed to respondents as soon as possible after the receipt of the registration forms.

A coding manual will be prepared. Questionnaires will be checked for consistency and completeness as they are being coded.

If practicable, an attempt will be made to contact a sample of non-respondents by telepnone to determine why the questionnaire was not returned and to obtain the information by interview.

8. Data Processing and Analysis

Data processing will be handled by the Socio-Economic Division (Ottawa) and the analysis will be prepared by the Prairie Regional Office.

The keypunching will be verified. Both logical and arithmetic ranges will be checked.

The Statistical Package for the Social Sciences (SPSS) will be used to compile the necessary tables and statistics.

For other editing functions, we will rely on optional constraints which can be imposed on data runs when using the SPSS survey package.

Weighting factors will be applied to survey records to adjust for non-response. Origin (Canada, USA, and Other) and type of group (Commercial Tour, Organized Group, and Other) will be used.

9. Offical Language Requirements

All survey material mailed to the respondents will be translated. If subsequently contacted, only bilingual staff will be used to interview respondents.

Table 8: Visitor Use

(1) CROSS TABULATIONS

ORIGIN 1	by	
	Q3	Trip purpose
	Q4(a)	Pre-trip planning information
	Q4(b)	Information adequate
	Q5	Parks information (a) to (k)
	Q6	Personal requests (a) to (e)
	Q7	Local information (a) to (g)
	Q8	Satisfaction with park information
Q11 Improve access	by	
	Q9	Transport mode
	Q10	Who provided transportation
	Q12	Party type
	Q38(a)	Allow aircraft use
	Q38(b)	Type of flights
	Q40(a)	Like most
	Q40(b)	Like least
Q12 Party Type	by	
	Q14	Routes entered and left park
	Q17	Use of facilities (a) to (g)
	Q18	Satisfaction with facilities
	Q19	Additional facilities or improvements (a) to (i)
	Q20	Recreational activities (a) to (g)
	Q21	Warden assist
	Q37	Additional trails developed

Q12 Party type

Q20 Major recreational activities (a) to (g)
by

Q28	Number of visitors met
Q29(a)	Disturbed you
Q29(b)	Number or behaviour more disturbing
Q29(c)	Reasons
Q30	Where in the Park did you find other peoples behaviour disturbing
Q31	Measures to control use necessary
Q32	Max. number met before overcrowded
Q33	Opinion of various controls
Q34	Temporary restrictions
Q35	Use guide
Q36	Improve search and rescue capability

Note: Origin 1 = Canadian, U.S.A., Other

Origin 2 = N.W.T., Other Canadian, U.S.A., Other

Major Recreational Activities = Yes, no.

Table 11: Response Characteristics

(1) CROSS TABULATIONS	
Q44 Age and sex	by Q45 Education
Q43 Official language	by ORIGIN 1
ORIGIN 2	by Q1 Trip nights by Q15 Park nights

(2) OTHER	
RS(b) Travel region	(frequency)
RS(d) Planned length of stay	(frequency)
REGNWEEK	(histogram)

Note: REGNWEEK = recode RS(e)

10. Response Burden

This will be the first survey of park visitors. Potential respondents will be informed that their co-operation is voluntary and their response will be confidential. No other survey is contemplated for the next three to five years.

11. Reports and Publications

The final survey report will be an internal working document which will be available in the language it was written. If there is significant demand the report will be translated.

12. Confidentiality

No personal identifying information will be included on the survey file.

13. Project Funding

Printing	$ 200.00
Envelopes and Stamps	300.00
Posters and Buttons	200.00
Data Processing and Misc.	800.00
Total Cost	$1,500.00

CODING

LE PARC NATIONAL AUYUITTUQ ENQUETE AUPRES DES VISITEURS

English on reverse side

1 ☐☐☐☐

Auriez-vous l'obligeance de nous aider en répondant à quelques questions concernant votre visite au Parc National Auyuittuq? Les questions doivent être répondu soit par un crochet (✓) dans les espaces prévus, soit par une réponse écrite ou soit par un numéro correspondant à votre choix. Votre écriture doit être lisible. Comme vous avez personnellement été selectionné, vous êtes la seule personne qui devez remplir le questionnaire.

VOICI QUELQUES QUESTIONS AU SUJET DE VOTRE VISITE.

1. AU TOTAL COMBIEN DE NUITS AVEZ-VOUS ÉTÉ ABSENT DE VOTRE FOYER DURANT CE VOYAGE? 5 ☐☐

_____nuits

2. EST-CE QUE LE PARC: 7 ☐

était la destination principale de votre voyage?.... ☐ 1

un de plusieurs arrêts prévus dans ce voyage?..... ☐ 2

autre (*veuillez préciser*)_____

3. POURQUOI AVEZ-VOUS VISITÉ LE PARC? 8 ☐

_____

INFORMATION ET ORIENTATION

4. (A) EN PLANIFIANT VOTRE VOYAGE (AVANT DE QUITTER VOTRE DOMICILE) QUELLE ÉTAIT VOTRE PRINCIPALE SOURCE DE RENSEIGNEMENT SUR LE PARC: 9 ☐☐

une demande de renseignement écrite faite au parc..... ☐ 1

une visite antérieure au parc..... ☐ 2

des amis, des parents qui avaient déjà visité le parc..... ☐ 3

une agence de tourisme, de voyage organisé..... ☐ 4

une autre source de renseignements de Parcs Canada..... ☐ 5

l'Office de Tourisme du Canada..... ☐ 6

Travel Arctic..... ☐ 7

des journaux, revues, livre-guides, cartes..... ☐ 8

la télévision, la radio..... ☐ 9

un transporteur aérien..... ☐ 10

un groupe ou club spécialisé..... ☐ 11

autre (*veuillez préciser*)_____

(B) ÉTANT DONNÉ VOTRE EXPÉRIENCE AU PARC, PENSEZ-VOUS QUE LES RENSEIGNEMENTS PRÉALABLEMENT OBTENUS ÉTAIENT SUFFISANTS? 11 ☐

Oui, les renseignements étaient suffisants..... ☐1

Non, les renseignements n'étaient pas suffisants..... ☐2

Si non, pourquoi pas?

_____

5. A VOTRE ARRIVÉE, EN VOUS INSCRIVANT AU BUREAU DE L'ADMINISTRATION DU PARC:

AVEZ-VOUS ÉTÉ RENSEIGNÉ SUR LES DISPOSITIONS DU PARC POUR:	Oui 1	Non 2

OBJET: LA RESERVE DE PARC NATIONAL AUYUITTUQ
ENQUETE AUPRES DES VISITEURS

Cher visiteur/chère visiteuse

Parcs Canada effectue actuellement une étude qui l'aidera à planifier l'aménagement du parc national Auyuittuq. Nous aimerions que vous nous fassiez part de vos impressions sur la gestion à la réserve ainsi que sur votre séjour. En répondant au questionnaire ci-joint, vous contribuerez de façon précieuse à la protection de cet emplacement pour les générations futures. Les renseignements demandés sur votre voyage serviront aussi à la planification du tourisme régional et de certains travaux d'aménagement dans les Territoires du Nord-Ouest.

Maintenant que votre séjour à la réserve du parc national d'Auyuittuq est terminé, nous vous demandons de bien vouloir prendre quelques minutes pour remplir le questionnaire ci-joint et de nous le retourner par la poste en utilisant l'enveloppe affranchie et adressée fournie. Vous êtes libre de participer ou non et, si vous le faites, vos réponses seront considérées comme étant STRICTEMENT CONFIDENTIELLES. Pour vous remercier du temps que vous aurez pris à fournir les renseignements demandés, Parcs Canada vous enverra, au retour du questionnaire rempli, une épingle de boutonnière.

Je profite de l'occasion pour vous remercier à l'avance de votre collaboration et vous prie d'accepter l'expression de mes sentiments les meilleurs.

Bien à vous,

Jay Beaman
Directeur, Division socio-économique
Parcs Canada

RE: AUYUITTUQ NATIONAL PARK RESERVE
PARK USE SURVEY

Dear Park User:

Parks Canada is conducting a survey of visitors to Auyuittuq National Park Reserve to help plan for the future of this park reserve. We would like you to share with us your views about the management of this park reserve and your visit. By answering the enclosed questionnaire you will make a valued contribution to the protection of this reserve for the appreciation and enjoyment of future generations. Information about your trip will also be used to support regional tourism planning and development initiatives in the Northwest Territories.

Now that you have completed your trip to Auyuittuq National Park Reserve would you please take a few minutes to complete the enclosed questionnaire, place it in the stamped, self-addressed envelope provided, and post it in any convenient mailbox. Your participation is voluntary and your answers will be kept STRICTLY CONFIDENTIAL. In appreciation of the time you have taken to provide this information Parks Canada will be forwarding a lapel pin upon receipt of the completed questionnaire.

May I take this opportunity to thank you in advance for your time and co-operation.

Yours sincerely,

Jay Beaman
Director, Socio-Economic Division
Parks Canada

Il y a environ un mois, Parcs Canada vous a envoyé un questionnaire portant sur votre voyage dans les Territoires du Nord-Ouest et votre séjour au parc national Auyuittuq. Si vous avez déjà rempli et retourné le questionnaire en question, veuillez ne pas tenir compte de la présente lettre. Si, par contre, vous n'avez pas encore répondu au questionnaire, nous aimerions vous inciter à le faire. Nous vous rappelons que ces renseignements nous seront très utiles pour la planification et la gestion de l'aménagement du parc.

Vos réponses seront strictement confidentielles. et nous vous serions très reconnaissants de votre collaboration. Parcs Canada vous enverra une épingle de boutonnière au retour du questionnaire rempli.

Merci encore!

Bien à vous,

Jay Beaman
Directeur, Division socio-économique
Parcs Canada

About one month ago Parks Canada sent a questionnaire to you about your trip to the Northwest Territories and your visit to Auyuittuq National Park Reserve. If you have already completed and returned this questionnaire please disregard this letter and enclosure. If you have not done so already, we would like to encourage you to fill out this questionnaire. This information is a very important element of our effort to manage and plan future park development.

Your answers will be kept strictly confidential and your co-operation is greatly appreciated. Parks Canada will be forwarding a lapel pin upon receipt of the completed questionnaire.

Thanks again!

Sincerely,

Jay Beaman
Director
Socio-Economic Division
Parks Canada

Cher visiteur/Chère visiteuse,

Au nom de Parcs Canada, je tiens, par la présente, à vous remercier d'avoir participé à l'enquête sur les visiteurs de la réserve de parc national Auyuittuq. Les renseignements dont vous nous avez fait part seront fort utiles pour la gestion future de ce parc. Grâce à la collaboration de gens comme vous, Parcs Canada saura mieux réagir aux priorités de son programme et, ainsi, mieux répondre aux besoins des futurs usagers du parc.

Recevez, ci-joint, l'insigne de boutonnière de Parcs Canada que nous vous offrons en guise de reconnaissance. Je vous remercie encore une fois de votre collaboration.

Bien à vous,

Jay Beaman
Directeur
Division socio-économique

Dear Park User,

On behalf of Parks Canada I would like to take this opportunity to thank you for participating in the Auyuittuq National Park Reserve Visitor Survey. The information you have provided is a valued contribution to planning for the future of Auyuittuq National Park Reserve. With the co-operation of people such as yourself, Parks Canada will better respond to the priorities of its program to better serve future Park Reserve users.

Please find enclosed a Parks Canada lapel pin as a token of our appreciation. Once again, thank you for your co-operation.

Yours sincerely,

Jay Beaman
Director
Socio-Economic Division
